

- 1. If using pycharm to run the program, please configure your interpreter, you may use system interpreter python 3 and above (3.10 is being used).**
- 2. To run the application on windows with python already installed run or double click the “ecom.py” python file.**
- 3. Other python files are function library that I created to improve the coding efficiency.**
- 4. There is a document in the folder explaining the application flow under the name of “Application flow\_and\_test case.pdf”**
- 5. The following link leads to a video describing a walkthrough of the system.**  
**<https://youtu.be/urnvH8mgWEA>**
- 6. Thank you.**
